Quality adhesives – for seamless processing

Planatol has been an expert manufacturer of adhesives for more than 85 years. We have comprehensive expertise especially when it comes to the bonding of refined paper and cardboard stocks, foils and finished surfaces.

- ✓ **Powerful bonds**
- ✓ **Extensive range of products**
- ✓ **For a wide variety of requirements**

Not only do we offer cost-efficient standard solutions, but we also develop special solutions tailor-made to fit your needs. We assist you in finding the right combination of product quality and process efficiency.

Adhesives for traditional and innovative packaging

Folding box & corrugated cardboard

- Construction precision, usable as single or multi-point scheme
- High precision and low spray, even on high-speed machines
- Excellent nozzle flow properties

- Dispersions, PSA and hotmelts
- Nozzle / roller / disc or wheel application

End of line solution

- Processing of difficult substrates and high production speeds
- Powerful and effective in usage
- Special temperature requirements
- Cost-efficient standard solutions

- EVA & metallocene hotmelts
- PSA
- Nozzle / roller / disc or wheel application

Paper sack production

- For paper sacks, valve sacks, tube sacks and cross-floor sacks
- Wide number of viscosity ranges
- Heavy-duty bonding
- Paper and foils

- EVA & metallocene hot melts
- Dispersions and PSA
- Nozzle / roller / disc or wheel application
- Sealing adhesives
